BASS GUITAR TABLATURE EXPLANATION

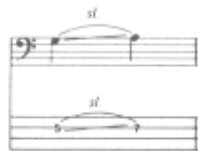

Bass tablature is a four-line staff that graphically represents the bass fingerboard. By placing a number on the appropriate line, the string and fret of any note can be indicated. The number 0 represents an open string. For example:

Definitions for Special Bass Notation (For both traditional and tablature bass lines)

BEND: Strike the note and bend up 1/2 step (one fret).

SLIDE: The first note is struck and then the same finger of the left hand moves up the string to the location of the second note. The second note is not struck.

FRETBOARD TAPPING: Hammer ("tap") onto the fretboard with the index or middle finger of the right hand and pull off to the note fretted by the left hand ("T" indicates "tapped" notes).

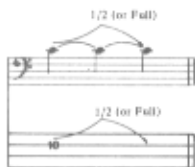

BEND: Strike the note and bend up a whole step (two frets).

SLIDE: Same as above, except the second note is struck.

NATURAL HARMONIC: The left hand lightly touches the string over the fret indicated, then it is struck. A chime-like sound is produced.

LEGATO BEND AND RELEASE: Strike the note. Bend up 1/2 (or whole) step, then release the bend back to the original note. All three notes are tied; only the first note is struck.

SLIDE: Slide up to the note indicated from a few frets below.

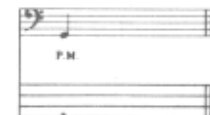

ARTIFICIAL HARMONIC: The note is fretted normally and the harmonic is produced by lightly touching the node point on the string with the edge of the right-hand thumb while simultaneously plucking with the right-hand index or middle finger.

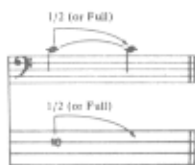

GHOST BEND: Bend the note up 1/2 (or whole) step, then strike it.

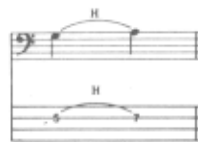

SLIDE: Strike the note and slide up an indefinite number of frets, releasing finger pressure at the end of the slide.

PALM MUTE: If using a pick, the note is partially muted by the right hand lightly touching the string just before the bridge.

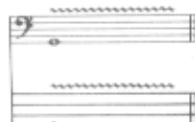

GHOST BEND AND RELEASE: Bend the note up 1/2 (or whole) step. Strike it and release the bend back to the original note.

HAMMER-ON: Strike the first (lower) note, then sound the higher note with another finger by fretting it without picking.

MUFFLED STRING: A percussive sound is produced by laying the left hand across the string without depressing it to the fretboard and striking it with the right hand.

VIBRATO: The string is vibrated by rapidly bending and releasing a note with the left hand.

PULL-OFF: Both fingers are initially placed on the notes to be sounded. Strike the first (higher) note, then sound the lower note by pulling the finger off the higher note while keeping the lower note fretted.

SLAP AND POP: Slap (S) the string with the side of the thumb. Pop (P) or snap the string with the index or middle finger by pulling and releasing it so that it rebounds against the fretboard.

2. Bang your head against the stage like you never did before.
Make it ring, make it bleed, make it really sore.
In a frenzied madness with your leather and your spikes,
Heads are bobbing around, it's hot as hell tonight. *(To Chorus)*
3. Here onstage the Marshall noise is piercing through your ears.
It kicks your ass, kicks your face, exploding feeling nears.
Now's the time to let it rip, to let it fuckin' loose.
We're gathered here to maim and kill 'cause this is what we choose. *(To Chorus)*
4. Show is through, the metal's gone, it's time to hit the road.
Another town, another gig, again we will explode.
Hotel rooms and motorways, life out here is raw.
But we'll never stop, we'll never quit 'cause we're Metallica. *(To Chorus)*
